FROM: APIQR/API Repair & Remanufacture Programs

TO: APIQR Registrants with Scope Statements that Include Reference to API 16AR

RE: API 16AR Repair & Remanufacture Program Transition Reminder

This is a reminder of API's transition process for organization's that have a reference to API 16AR in their API Q1 or ISO 9001 scope statement.

As stated in the [notification](#) dated January 22, 2025, organizations must submit an API Repair and Remanufacture Program application by October 1, 2025 to ensure that their scope continues to include the reference to API 16AR during the transition process. Our records show that your organization has not yet submitted an API Repair and Remanufacture Program application. If you do not submit an application by October 1, API will modify your certificate to remove the reference to API 16AR starting on October 2, 2025.

Please keep in mind that, once the application has been submitted, organizations have 45 days to submit payment for the application. Your APIQR Registration scope will maintain the reference to API 16AR as long as you continue the application and auditing process within the required timelines. Upon issuance of an API 16AR Repair and Remanufacture Program License, your existing API Q1 or ISO 9001 certificate will be modified to remove reference to API 16AR.

For any questions or concerns related to this notification, please contact us at www.api.org/ContactCertification.

Your continued support of and participation in the Certification Programs are greatly appreciated.

Sincerely,

Kevin Ferrick
Senior Director, API Certification Programs
